

Bottle top Christmas tree decorations

It can be difficult to recycle bottle tops, use them to make these cute kitsch hanging decorations!

You will need:

Bottle tops of different sizes - I found 3 was enough for each.

Narrow ribbon to hang them

Embellishments to decorate

Paint, tissue paper or fabric to cover the tops

Method:

I made three different bottle top decorations.

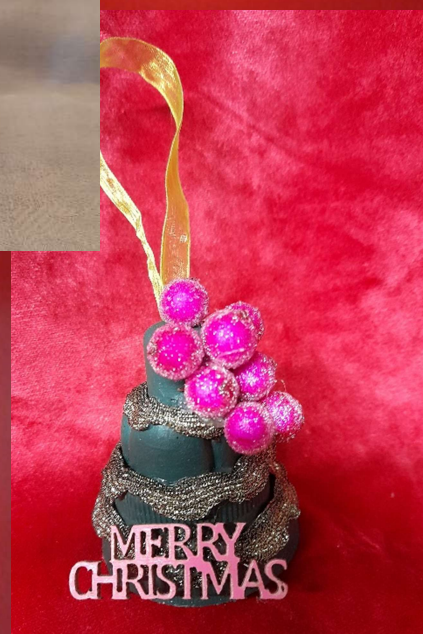

First arrange the bottle tops so the biggest is at the bottom and the smallest is on top. Make sure you are happy with the arrangement.

To cover with fabric, you will need to cut small circles of fabric which are big enough to cover the lid and tuck in underneath. Secure with a glue gun and then glue the lids together as shown.

If painting or decoupage, glue the lids together with a hot glue gun then paint or cover with tissue paper.

Poke a hole in the top and then push the end of your hanging ribbon through. A drop of glue is enough to secure this.

You can then embellish!
