Worth Way

A Shared-Use Route

Further contacts

For further information on walking and other countryside activities in West Sussex and for a copy of the Forest Way leaflet contact West Sussex County Council.

Tel 01293 542088.

Introduction

Worth Way is a seven mile (11 kilometre) route from Three Bridges to East Grinstead. Officially opened on the 10th July 1979, it forms a valuable wildlife corridor and shared-use route for pedestrians, horse-riders and cyclists. Part of Worth Way is a Country Park (bylaws apply). The National Cycle Network (Route 21) from London to Eastbourne passes along Worth Way. Worth Way from Three Bridges to M23 lies within Crawley Borough. West Sussex County Council manages the remainder of Worth Way.

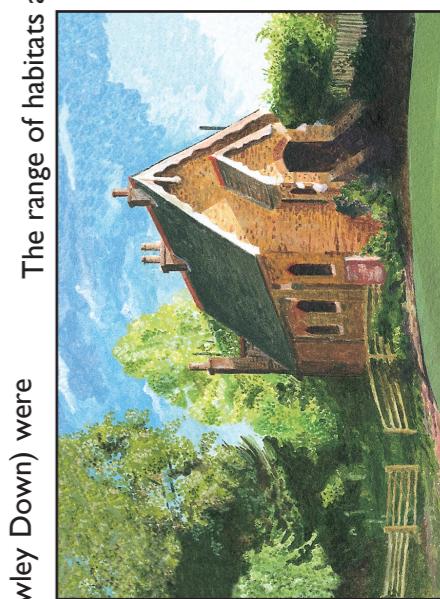

Finding Your Way

This leaflet is only a guide. Inset maps are provided at difficult points but you are recommended to use the following OS maps in conjunction with this guide.
Sheet 187 Dorking & Reigate
1:50 000 Landranger Series
1:25 000 Explorer Series
1:35 Ashdown Forest

History

For much of its length Worth Way follows the railway line which ran from East Grinstead to Three Bridges. Opened on 9th July 1855, Rowfant and subsequently Grange Road (Crawley Down) were the only stations along the route. In 1866 the railway was extended from East Grinstead to Tunbridge Wells most of which is now Forest Way. A century later the whole line was closed as part of the line closures proposed by the then British Rail Chairman, Dr Beeching, in the 1960's.

Where chalk was used in the construction of the railway, chalk loving plants such as Common Spotted Orchid and Wild Strawberry flourish.

Rowfant Station

Rowfant Station, although not open to the public, still survives. Grange Road station no longer exists. The site, to the west of the Royal Oak public house, is now a terrace of shops and the railway line from Grange Road to Cob Close has been built over.

Little remains of another section of the railway line between the M23 motorway and Keepers Crossing as the cutting was used as a landfill site in the 1970s. A line of trees indicates the route of the former railway line.

Wildlife

Worth Way supports a diverse variety of wildlife and much of the route has been designated a Site of Nature Conservation Importance. Since the closure of the railway much of its length has been colonised by trees such as Ash and Silver Birch, and shrubs including Hazel and Sallow.

Elsewhere open areas are regularly cut. This prevents scrub from invading and allows species that like open conditions to survive.

Ditches help to keep the route dry but are also important for wildlife. A relatively large pond exists at Crawley Down (Crawley Down Pond). This is managed with the assistance of a local voluntary group, the Pond Environmental Group.

Speckled Wood Butterfly

Butterflies too are seen in good weather. The most notable is the White Admiral which flies in June whilst Speckled Wood Butterflies can often be seen defending their territories in sunny glades.

Mammals and reptiles are elusive but a quiet approach can provide a glimpse of Roe Deer and Fox on surrounding farmland. Bats can sometimes be seen at dusk.

Management of Worth Way aims to maintain a mosaic of differently aged trees and shrubs together with open areas. Some of the trees and shrubs are coppiced in rotation. Coppicing is a traditional form of management whereby trees and shrubs, notably Hazel, are cut down to the base. This benefits plants such as Primroses, and a variety of insects, which thrive with the increased light and warmth. The dense regrowth of stems in turn provides valuable nesting sites for birds.

</

St Nicholas Church, Worth

A fine Saxon Church dating from the tenth century. It is an early example of a cruciform plan which later became the general layout throughout England. A Norman-looking northeast tower was added in 1871.

Rowfant Station

The station included a passing loop, level crossing and signal box. The old station still survives.

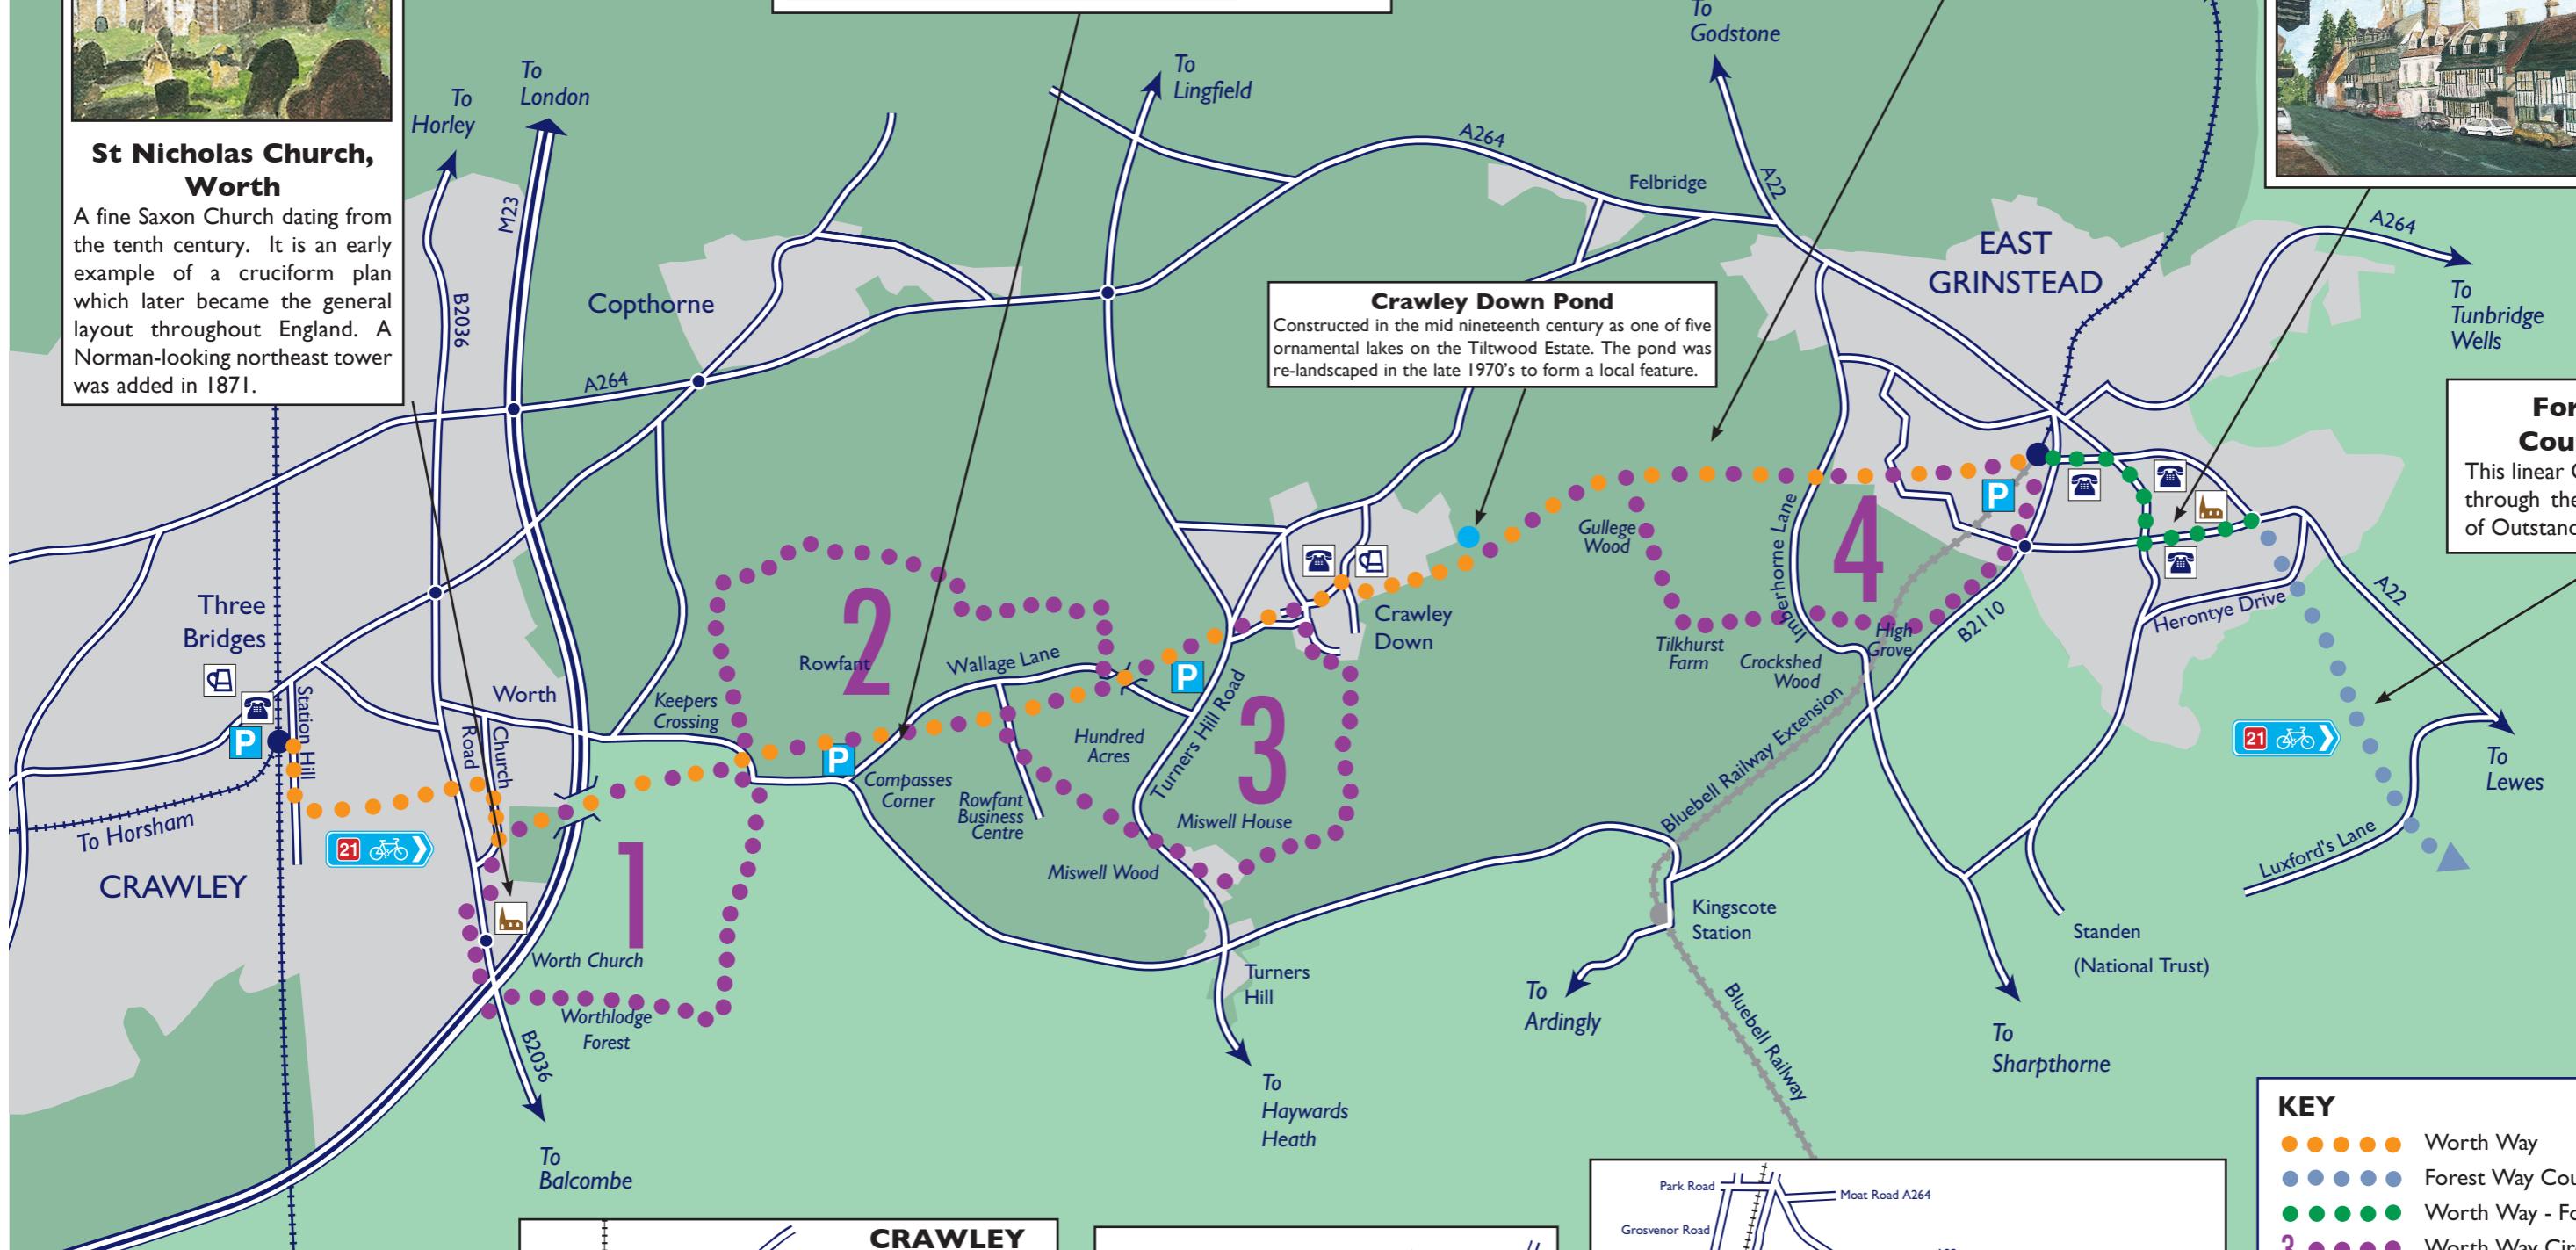

Gullege

A private house

East Grinstead High Street

A very old and previously important market town boasting the longest line of medieval buildings in the country. There are many interesting buildings including St Swithun's Church, a very prominent landmark, and Sackville College.
