

# West Sussex Log List

*Where to buy woodfuel and wood burning stoves in West Sussex*

## Handy Hints

Generally the heavier the log the longer it will burn – use birch or alder to get your fire going and burning fast, mix and match different woods once it's established and put on oak or beech to keep it in over night. And don't forget to get your chimney swept regularly!

*Beechwood fires are bright and clear  
If the logs are kept a year  
Chestnut's only good, they say  
If for long 'tis laid away  
But Ash new or Ash old  
Is fit for a Queen with Crown on gold*

*Birch and fir logs burn too fast  
Blaze up bright and do not last  
It is by the Irish said*

*Hawthorn bakes the sweetest bread Elm  
wood burns like churchyard mould E'en  
the very flames are cold  
But Ash green or Ash brown  
Is fit for a Queen with a golden crown*

*Poplar gives a bitter smoke  
Fills your eyes and makes you choke  
Apple wood will scent your room  
With incense like perfume  
Oaken logs, if dry and old  
Keep away the winters cold  
But Ash wet or Ash dry  
A King shall warm his slippers by Anon*

Welcome to the West Sussex Log List. It lists firewood merchants and stove suppliers across the county of West Sussex.

With rising electricity, gas and oil prices, more and more people are turning to wood to heat their homes. Using logs from local woodlands has many environmental benefits.

- It is virtually *Carbon Neutral*. (There will be some carbon dioxide emissions from transportation). This means the carbon dioxide produced from burning the wood is absorbed by existing trees and there is only as much CO<sub>2</sub> released as the tree absorbed in its lifetime. Therefore, using wood for fuel does not contribute to climate change.
- Wood is a renewable resource.
- Logs cut locally have not been transported long distances; this also has wide reaching environmental implications.
- Woodland management contributes to the rural economy and supports local jobs.
- Appropriate woodland management benefits wildlife and enhances the landscape.

### Questions to ask your log supplier

- Is the wood seasoned or green? (You should only burn wood that has been cut down for a year or more; unseasoned wood may present a fire hazard or cause chimney damage)
- How far will they deliver?
- Is delivery included in the price?
- Is it suitable for an open fire or a woodburning stove? (Some wood spits so is therefore not suitable for open fires.)
- Are they selling by weight or volume and how much does it cost? (in other words, what constitutes a 'load'?)
- What sort of wood – birch burns faster than oak for example.
- Check with your supplier whether the cost includes stacking.
- Most log merchants also supply kindling – you will need it.
- Why not ask your log merchant if they sell off cuts or small logs – great for reviving your fire if it begins to die down.

Please mention this leaflet when placing your order.

### Wood Burning Stoves

When running at optimum efficiency, wood burning stoves can be 80% efficient. They are normally used for background heating, although some higher output versions, fitted with a back boiler, heat hot water and radiators. Sophisticated multifuel stoves mean you can swap between wood and coal and switch to gas or electricity to heat hot water in the summer. Typically, costs are between £1500 and £3000.

Remember, if you are buying a wood burning stove, please ensure that your installer is HETAS registered. Otherwise, you must seek Building Regulations Approval from your local authority before proceeding.
