Assistant director for Highways Transport and Planning**

Matt Davey

Matt Davey

1. Background

As the Local Highway Authority, West Sussex County Council (WSCC) is responsible for the maintenance of the local highway network and has a statutory duty to deliver a safe, serviceable, and resilient network.

Resilience in this context is the ability of a road network to withstand not only the impacts of extreme weather (snow, ice, flooding, heat, or high wind) but also industrial action, major incidents, and other local risks. It should therefore be maintained in a condition that makes it more resilient to failure than the remaining network and allows it to recover promptly from the effects of these events.

The level of resilience sought for any length of road needs to be proportionate with the intensity of use, economic or social importance and the availability of alternatives. The more important a route is, the shorter the disruption that is acceptable.

The Highway Asset management Policy and Strategy set out our risk-based approach to maintenance of the whole network. This includes the identification of a Resilient Network which is the portion of our highway network that is the most important in maintaining economic activity and enabling access to key services. It should be noted that The National Strategic Road Network (SRN) comprised of motorways and trunk roads is managed by National Highways

The purpose of this document is to set out how we define the Resilient Network. How the Resilient Network feeds into the programming for planned maintenance in terms of prioritisation scoring to ensure a higher weighting is given minimising the risk to the network, and how we respond to emergency events that affect it.

1.1. Best practice guidance

In 2012 the first national Climate Change Risk Assessment (CCRA) analysed 100 potential impacts of climate change to 11 sectors. For the transport sector the assessment identified flooding, landslides, heat damage and bridge scour as important risks. This has been followed up with the 2016 report, which highlights further issues.

The Government released the first National Adaptation Programme (NAP) in July 2013. It contains a series of objectives and associated actions to tackle risks identified in the CCRA. Most notably regarding highway infrastructure management, objectives 7 and 8 are:

- To ensure infrastructure is located, planned, designed, and maintained to be, resilient to climate change, including increasingly extreme weather events.
- To better understand the vulnerabilities facing local infrastructure from extreme weather and long-term climate change to determine actions to address the risks.

The severe winter weather of 2013/14 had a major impact on transport systems across the UK, including many local roads which were flooded for prolonged periods. For Southern England it was the most exceptional period in the last 248 years according to the Meteorological Office. Because of this disruption, the Secretary of State for Transport commissioned a Transport Resilience Review, which was published in July 2014. A key recommendation was "that Local Highway Authorities identify a 'Resilient Network' to which they will give priority, to maintain economic activity and access to key services during extreme weather."

The Code of Practice for Well-Managed Highway Infrastructure (WMHI Code) published by the UK Roads Liaison Group also provides additional guidance in developing good practice. The Code includes Recommendation 20 – Resilient Network which states: “Within the highway network hierarchy a 'Resilient Network' should be identified to which priority is given through maintenance and other measures to maintain economic activity and access to key services during extreme weather” and provides further details on how this should be implemented.

2. Identifying the Resilient Network

The overarching aim of the West Sussex Resilient Network Plan is to keep West Sussex moving, particularly during emergencies. It will do this using a risk-based approach to ensure the delivery of an efficient and effective service that will help to:

- protect economic activity in and through the county
- protect access to key services
- protect access to key infrastructure

It is not designed to link every community, facility, or emergency service across the county. The development of the Resilient Network directly supports 'Our Council Plan's' priorities

1. Keeping people safe from vulnerable situations.
2. A sustainable and prosperous economy.
3. Helping people and communities to fulfil their potential.
4. Making the best use of resources.

It also supports the objectives of the 2022 – 36 West Sussex Transport Plan

Objective 1: Support sustainable economic prosperity across the County by enabling recovery from the COVID-19 pandemic and levelling-up underperforming areas.

Objective 2: Support development and regeneration plans across the County by enabling local living and through strategic investments, particularly in sustainable modes of transport, at the right time and place to ensure the transport network is fit for the future.

Objective 3: Accommodate the needs of an ageing population that is expected to grow most in existing settlements in the Gatwick Diamond and Coastal West Sussex areas.

Objective 4: Avoid where possible and minimise air, noise and light pollution from use of the transport network to minimise impacts on public health and well-being.

Objective 5: Ensure the transport network allows residents and visitors (including people with disabilities) to live healthy lifestyles with good access to green and blue spaces, particularly the West Sussex coast and the protected South Downs, High Weald and Chichester Harbour.

Objective 6: Ensure rural communities can live locally by accessing local services or nearby towns.

Objective 7: Enable the transport network to achieve net zero carbon emissions by 2050.

Objective 8: Avoid where possible and minimise the impacts of the transport network on natural resources and on the natural, built and historic environment.

Objective 9: Improve the transport network whilst conserving and enhancing biodiversity.

Objective 10: To monitor and adapt infrastructure to the effects of climate change.

Objective 11: Reduce the need to travel by car by enabling local living.

Objective 12: Improve the efficiency of the County Strategic Road Network, particularly east-west routes including the A27, through targeted improvements to address congestion, pollution, rat-running and road safety issues on strategic or local routes.

Objective 13: Minimise the impacts on the transport network of surface access to Gatwick Airport by passengers and employees and ensure transport network improvements take the needs of other users and communities that share these routes into account.

Objective 14: Ensure the rail network is an attractive option for travel between West Sussex towns and to surrounding cities by improving the speed and quality of West Coastway and Arun Valley Line services, capacity on the Brighton Main Line and integration with other modes of transport.

Objective 15: Improve bus network efficiency and integration by reducing the effects of congestion into and within West Sussex towns, particularly where there are gaps in the rail network.

Objective 16: Ensure the bus network is customer focused and integrated with other modes of transport to provide an attractive option for journeys to nearby towns.

Objective 17: Extend and improve the network of active travel facilities so it is coherent and high quality enough to make active travel an attractive, safe option for short distance trips and to transport interchanges.

2.1. Methodology

The WMHI Code of Practice recommends that a Resilient Network should include those routes crucial to the economic and social life of the local or wider area; it should take account of repeat events, such as flooding; and other local factors. It should list examples of key routes and infrastructure

The following criteria have been used to identify and map a network of our most critical routes and highway assets. It includes all roads that provide:

- The main connection between major communities.
- Links to the County Strategic Road Network (CSRN) (i.e. motorways and important A roads. managed by National Highways)
- Connectivity across authority boundaries.
- Links to transport interchanges.

In addition, it includes the most direct, major route to the following key locations from the nearest A road or other part of the Resilient Network:

- Emergency facilities including Fire and Rescue centres, Police Stations, Ambulance Services, Hospitals
- Prisons, primary council offices, primary WSCC depots, commercial harbours,
- Links to Critical infrastructure as defined in the WMHI Code of Practice
- Principal public transport routes including bus stations, garages/depots, and key rail stations

- Other locally important facilities e.g., business/industrial parks.

Additional routes may be added to the Resilient Network if required in an emergency. For example, routes to vaccination centers, temporary mortuaries or where a long-term diversion is necessary if part of the Resilient Network requires major work. Although it is not possible to prepare for every situation, a list of temporary key locations that form part of established emergency response plans e.g., rest centers will be compiled. This allows for appropriate routes to be determined in advance to save time in an emergency.

The West Sussex Resilient Network is around 16.4% of the network (663.7km out of a total of 4,046.2 km.) It is a slightly higher percentage than usual due to the rural nature of the county, remote communities, and key services.

2.2. The Resilient Network

A list of the roads that make up the Resilient Network and maps can be found in appendix A.

3. Minimising Risk to the Network and Managing Disruptive Events

The DfT recommends: All risks associated with adopting the Resilient Network have been documented together with mitigation. This should cover resilience against snow, ice, flooding, exceptional heat, industrial action, major incidents, and other local risks. Should the network be subject to deep snowfall then the full precautionary gritting routes shall be reduced to the defined resilient network as a priority.

The WMHI Code of Practice advises: The risk of specific asset failure, to the extent that it leads to closure or restriction of the Resilient Network, should be assessed. This should consider the likelihood of failure due to the asset's physical attributes and its location (e.g., design capability / capacity, condition, geology, catchment characteristics). The socio-economic consequences of failure should also be considered and include the potential for community severance, the ability to respond to further emergencies, the suitability and length of any diversion route, typical traffic types and volumes, repair / recovery cost and timescale, and damage to statutory utility plant.

It recommends achieving resilience through a combination of:

- Resistance – preventing damage (e.g., a flood wall)
- Reliability – operation under a range of conditions (e.g., earthworks stabilisation)
- Redundancy – availability of backups or spare capacity (e.g., a suitable diversion route)
- Recovery – enabling a fast response and recovery (e.g., temporary bridges)

The aim is to include the Resilient Network in the Confirm IT system by road section. When a section of carriageway treatment is assessed for its priority, the system will flag up that is part of the resilient network, and an appropriate weighting will be applied to increase the priority score. This is work in progress with the intention that it is applied in 2023.

The following Emergency plans are in place and can be activated depending on the nature of the event:

- Corporate response and recovery plan
- Animal disease response plan
- Business continuity and resilience policy
- COMAH External GASHCo (Gatwick) fuel farm
- Communications Plan
- County emergency centre plan
- Emergency mortuary plan
- Finance plan
- IT disaster recovery plan (overview of arrangements)
- Outbreak response plan
- Pandemic contingency plan
- People management emergency situation policy
- Property, office relocation and strategy plan
- Severe weather plan
- Strike management plan
- Transport and evacuation plan
- Voluntary organisations plan
- Welfare plan
- Identification of vulnerable people plan – Annex A
- Joint care and nursing home closure response plan – Annex B
- Educational establishments plan – Annex C
- Reporting bases and emergency assistance centres plan – Annex D

The following table shows the potential events leading to disruption on the Resilient Network with preventative measures, response, and recovery actions. It also references external documents where relevant.

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
All incidents (common to all)	The WSCC Resilience and Emergency Team (RET) have systems in place to provide early warnings of incidents where possible so preventative measures can be taken if appropriate. They work with the Sussex Resilience Forum which is multi-agency partnership whose members work together to prepare, respond to and recover from emergencies and major incidents.	<p>Resilient Network established and kept up to date with input from stakeholders. Reviewed annually</p> <p>Reactive Contractor The highway maintenance contractor is required to have resources available 24hrs a day, 7 days a week to provide an emergency response.</p>	Issues identified on the Network as having a high impact on the safety and operation of the highway can be dealt with under our 'Emergency Response' service and will be responded to within 2hrs. This process can also be used to prioritise reactive responses on the Resilient Network where they cause or are likely to cause major disruption to traffic (if appropriate and proportionate).	<p>Communication to relevant stakeholders will take place.</p> <p>Debrief of relevant staff where appropriate.</p> <p>A post event review of this Plan and effectiveness of response with relevant stakeholders will take place, be fully documented</p>

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
	<p>We will keep up to date with latest innovations and research that may help to prevent or reduce the impact of extreme events. WSCC is a member of the Local Council Roads Innovation Group and meets regularly with authorities in the Southeast to discuss innovation.</p> <p>Innovation is a key Item on the agenda of the monthly Operations management Team meeting</p>	<p>See Contract for the provision of core highways maintenance services; Lot 1 of the highway's maintenance suite of contracts 2020</p> <p>Business continuity plans The vision statement says 'We will ensure that we have in place robust Business Continuity and Resilience Plans that ensure we are resilient and able to deliver critical services during adverse events and support residents and communities within the West Sussex Area</p> <p>Resilience and Emergency Team (RET) will be set up with defined roles and priorities within the Plan Plan reviewed every 3 years or after major event</p> <p>Communication Plan</p> <p>The plan deals with the following topics:</p>	<p>Disruption to the Resilient Network will be minimised through appropriate network management. E.g., establishing diversion routes; minimising duration of works that disrupt traffic flow or ensuring there are suitable alternative routes where appropriate. Traffic Sensitive Streets have been identified and are used to inform decision making.</p> <p>The Business Continuity Plan including set up of the RET, Communication Plan, Severe Weather Plan and any other relevant plan depending on the nature of the event will be followed.</p> <p>Senior management and the Council's Emergency Response Team can provide additional support if necessary.</p>	<p>Information will be used to inform future preventative measures and response to incidents. This may take the form of planned works to prevent flooding, risk assessments of Highway assets effected and process improvements to the emergency plans</p> <p>Lessons learned will be recorded and SMART actions put in place where appropriate.</p> <p>We will keep records of events to inform future planning and preventative measures.</p>

		<p>Plan activation and Initial response – holding statement</p> <p>At the Scene – Coordinating messages</p> <p>Incident Management Team - Developing a media strategy</p> <p>Media Centre – Managing sustained media interest</p> <p>Communication channels for Internal audiences</p> <p>Communication channel for External audiences</p> <p>Communications / Resilience and Emergency Team Response actions</p> <p>Other emergency plans will be actioned where appropriate</p>		
--	--	---	--	--

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
		<p>Severe Weather Plan</p> <p>The objectives are</p> <p>To detail the process of early assessment of potentially adverse weather which may affect the County and delivery of our services.</p> <p>To detail the alerting, standby and call out arrangements.</p> <p>To enable the Council to be pro-active in response to adverse weather incidents.</p> <p>To detail a framework for the Council to respond to indirect impacts of weather conditions e.g. drought, poor air quality.</p> <p>To describe the Council's input to the multi-agency response to adverse weather incidents.</p>		

In addition to the actions above, the following will also apply to the incidents listed below:

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
Asset failure	<p>Assets in good condition are more resilient to disruptive events.</p> <p>A risk-based Asset Management Strategy and Policy are in place for all assets, including critical structures. These inform the capital programme for preventative maintenance and repair works.</p> <p>To meet the Department for Transport recommendations, regular condition surveys are carried out on all highway assets by either SCANNER or Course Visual Inspection (CVI). The results of these allow WSCC to maintain a good understanding of the network and any risk of failure. These inform the forward programmes of planned works</p> <p>To ensure our entire network remains in a safe and serviceable condition</p>	<p>Maintain accurate and up to date asset information.</p> <p>Liaison between the reactive and planned works managers to ensure assets are maintained or repaired in the most effective way</p>	<p>The Inspection Manual sets out a risk-based approach to dealing with defects and safety issues. The Resilient Network can be prioritised if necessary/appropriate.</p> <p>A robust set of supply chain partners are available to rectify any asset failure in a timely manner</p>	<p>Reassess asset conditions and where required include asset in the planned works programmes or take reactive works</p>

	<p>the West Sussex Highway Asset Inspection Manual sets out a risk-based approach for carrying out regular safety inspections, responding to hazardous defects and carrying out permanent repairs. The Resilient Network is inspected monthly, or 6 monthly. Information about incidents regularly affecting the resilience of roads will be recorded e.g., if it is in a flooding hotspot or if there are sections that are more prone to damage</p> <p>Consideration will be given to designing for resilience when carrying out capital works, where appropriate and proportionate to the risks.</p>			
--	---	--	--	--

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
Flooding	<p>Our risk-based approach to maintaining drainage systems is based on silt levels.</p> <p>Works to rectify drainage issues which sit within the Resilient Network, where the nature of the fault is likely to or could cause a road section to flood, will be prioritised based upon resources and need.</p> <p>Flooding hotspots on the resilient network are recorded within our asset management system, Confirm, these are reviewed.</p> <p>Additional funding is provided as WSCC recognise the impact climate change is having on extreme rainfall</p>	See above Severe weather Plan	<p>The Inspection Manual sets out a risk-based approach to dealing with hazardous flooding incidents. The Resilient Network can be prioritised if necessary/appropriate.</p> <p>Lot 1 contractors are available 24/7 which can be supported by the Lot 2 Drainage cleansing contractor Longer term solutions can be implemented via the Lot 6 Improvement framework contractors</p>	Update the Asset management system and highway inventory

Ice and snow	<p>Consideration will be given to designing for resilience when carrying out capital works where this is appropriate and proportionate to the risks.</p> <p>E.g. landscaping to reduce chance of snow drifts in areas where this has been identified as a problem.</p>	<p>A Winter Service Plan is produced annually containing details of event planning including weather monitoring, training, when, where and how gritting and snow clearance will take place.</p> <p>Roads on the Resilient Network will be part of the primary pre-salting network or secondary network.</p> <p>Operation snowflake is undertaken prior to the winter season to ensure resilience and assurity</p> <p>See Severe Weather Plan above</p>	<p>See Winter Service Plan and Communications Plan for details. Resilient Network is prioritised.</p> <p>Additional refills of grit bins and pipes, spot gritting and supply and distribution of bulk bags can be instructed, as necessary.</p>	<p>Review Winter Service Plan and effectiveness of response each year as well as after any major incidents.</p>
---------------------	--	--	---	---

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
High winds	<p>Trees are inspected as part of routine safety inspections by Highway Stewards for any obvious damage/disease that would make them vulnerable.</p> <p>An Ash Dieback Contract has been procured to remove vulnerable trees that would be high risk during high winds</p>	<p>Arrangements are in place for emergency crews to attend to trees affecting the highway because of high winds.</p>	<p>Tree clearance can be prioritised on the Resilient Network if necessary and appropriate.</p> <p>The Inspection Manual sets out a risk-based approach to dealing with defects and safety issues. The Resilient Network can be prioritised if necessary/appropriate.</p>	
Extreme heat e.g., fatting up, road deformation, high road temperatures causing tire blow outs	<p>Design for resilience when carrying out capital works where appropriate/possible and where proportionate to the risks. E.g. use of materials less prone to heat damage or paler surfacing materials that will emit less heat.</p>	<p>Sand held in stock for reducing impact of fatting up.</p>	<p>The Inspection Manual sets out a risk-based approach to dealing with defects and safety issues. The Resilient Network can be prioritised if necessary / appropriate.</p> <p>Sand can be spread by gritters or carried in the vans of CRT crews for application at problem areas.</p> <p>Flexible rotas in place allowing maintenance staff to work at cooler times of day</p>	

			<p>to ensure business continuity.</p> <p>Risk assessments are in place with all contractors</p>	
--	--	--	---	--

Disruption	Preventative measures	Planning for emergency events	Event Response	Event Recovery
Industrial Action	See Business Continuity Plan above	<p>Network Management Team will identify alternative routes if industrial action blocks part of the Resilient Network or critical assets. Traffic Sensitive Streets have been identified to inform these plans.</p> <p>Business continuity plans specifically cover the loss of staff or contractor due to industrial action.</p>		

Emergency Road Closures	<p>Network Management Team coordinate road closures and work closely with Local Highway Operations Team and utility companies etc. to minimise disruption of emergency road closures. Traffic Sensitive Streets have been identified to minimise disruption to roads with high strategic importance on the network.</p>		<p>Street works management can be prioritised on Traffic Sensitive Streets and on the Resilient Network if appropriate.</p>	
--------------------------------	---	--	---	--

Review process

In line with the WMHI Code of Practice requirement for evidence-based reviews, West Sussex County Council Highways have created a policy review process. This ensures all policies are reviewed every 2 years at a minimum or more frequently if triggered by an emergency event, change in legislation/ best practice guidance or in response to feedback from stakeholders etc.

This plan will be reviewed annually

4. Stakeholder Engagement

The WMHI Code of Practice advises: When defining the Resilient network, consideration should be given to engaging with the local Resilience Forum, or equivalent, key businesses and interest groups to jointly identify routes which are critical to the economic and social life of the area. Neighbouring Highway Authorities should also be consulted to ensure continuity of the Resilient Network at a regional level.

We have consulted with:

Internal Stakeholders

- Highway Maintenance Contractor
- Public Transport Team
- Flood Risk Management Team
- Traffic and Safety Team
- Resilience and Emergency Team
- Planning Services
- Major Projects and Growth Team

External Stakeholders

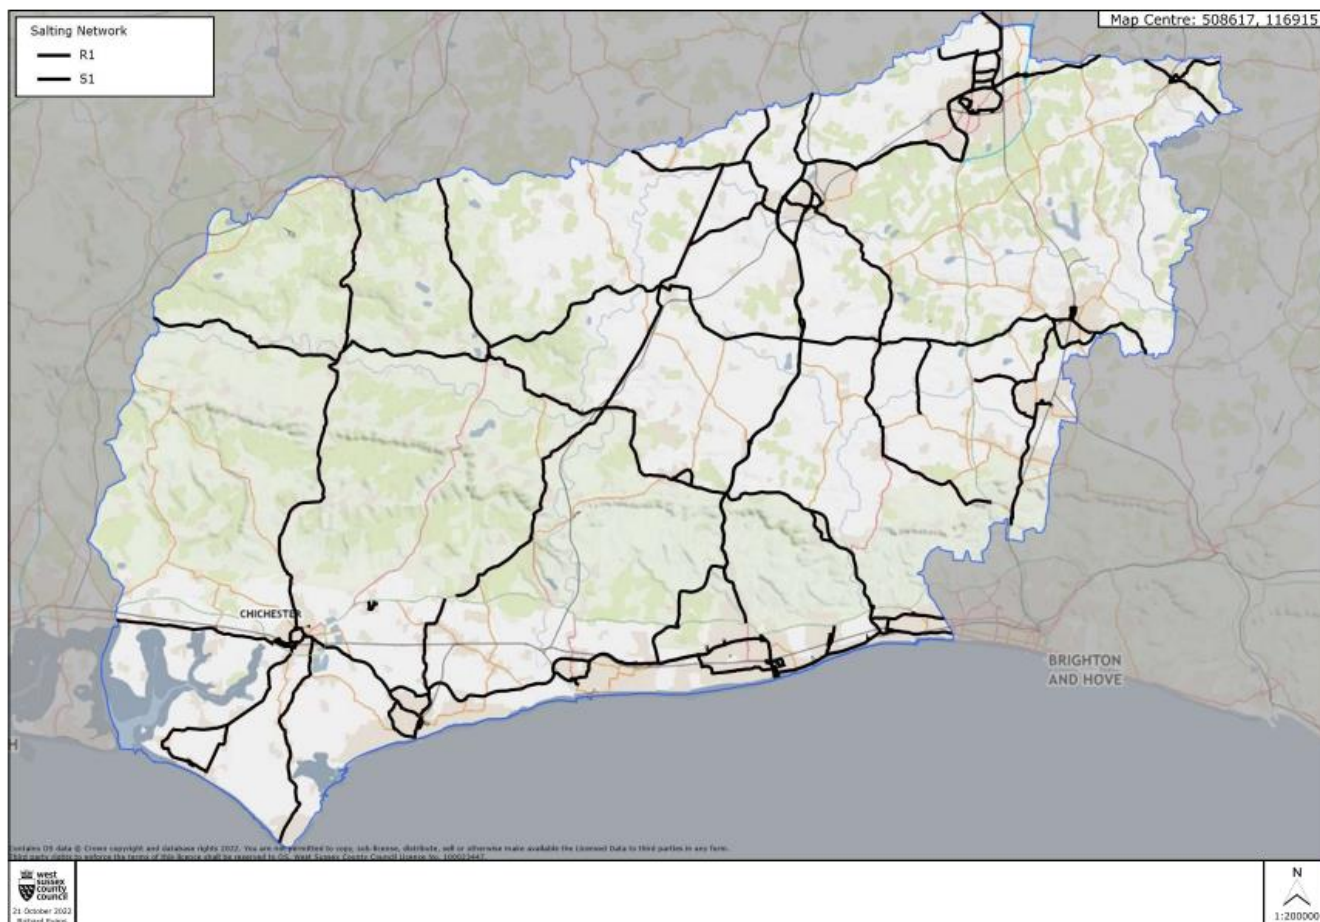

- Neighbouring highway authorities that share a border (Emergency Planning Officers and Highway Service)
- Sussex Resilience Forum members: Police, Fire, Ambulance, NHS, Coastguards
- Transport for the South East
- Network rail
- Bus operators
- National Highways
- Logistics UK
- District and Borough Councils Emergency
- Planning Officers

A copy of the document is published on our website.

Appendix A - Resilient Network Map/List

Resilient network

Roads on the Resilient Network are listed below

ROAD SECTION	ROADNAME	PARISH	LENGTH (M)
A283/21003	A283 GREATHAM BROOKS TO WIGGONHOLT COMMON	PARHAM	611
A283/22025	A283 WIGGONHOLT CHURCH TO WICKFOLD BRIDGE	PARHAM	370
C80/110	WESTERN ROAD	LANCING	53
A283/24035	LOWER STREET	PULBOROUGH	70
A283/24030	LOWER STREET	PULBOROUGH	196
A281/34025	BRIGHTON ROAD	HORSHAM	75
A281/27005	BRIGHTON ROAD	LOWER BEEDING	535
A259/50107	LITTLEHAMPTON ROAD WESTBOUND	FERRING	335
A259/24015	WORTHING ROAD	LITTLEHAMPTON	137

A259/25008	WORTHING ROAD	LITTLEHAMPTON	257
A29/6025	SHRIPNEY ROAD NORTHBOUND	BERSTED	38
A259/3012	THE HORNET	CHICHESTER	75
A259/3020	THE HORNET	CHICHESTER	150
A259/49005	LITTLEHAMPTON ROAD EASTBOUND	ANGMERING	922
A259/44103	NEW ROAD WESTBOUND	RUSTINGTON	420
A259/8005	CHICHESTER ROAD	BERSTED	172
A24/13010	FINDON BYPASS NORTHBOUND	FINDON	418
A29/10025	WESTERGATE STREET	ALDINGBOURNE	89
A283/4005	STEYNING ROAD	SHOREHAM / SOUTHWICK	74
A29/9014	SHRIPNEY ROAD	BERSTED	255
A29/10030	WESTERGATE STREET	ALDINGBOURNE	111
A259/50115	A259 WESTBOUND	FERRING	79
A29/10005	WESTERGATE STREET	ALDINGBOURNE	46
C80/315	WESTERN ROAD NORTH	SOMPTING	101
A259/47005	ROUNDSTONE-BY-PASS	ANGMERING	487
A29/14010	FONTWELL AVENUE	EASTERGATE	112
A29/17002	LONDON ROAD ROUNDABOUT	SLINDON	59
A272/13010	A272 FROM MINSTED LANE TO SEVERALS ROAD	STEDHAM WITH IPING	271
A259/4505	BOGNOR ROAD	CHICHESTER	361
A259/415	MAIN ROAD	SOUTHBOURNE	89
A272/13015	A272 FROM MINSTED LANE TO SEVERALS ROAD	WOOLBEDING WITH REDFORD	394
A272/14005	A272 SEVERALS ROAD TO WOOLBEDING LANE	WOOLBEDING WITH REDFORD	231
A259/618	MAIN ROAD	SOUTHBOURNE	102
A272/15030	PETERSFIELD ROAD	MIDHURST	21
A272/26008	A272 NEW ROAD TO THE HARROWS	TILLINGTON	270
A259/5105	A259 WESTBOUND	OVING	589
A259/5205	DRAYTON LANE ROUNDABOUT	OVING	158
A272/15040	PETERSFIELD ROAD	MIDHURST	92
A272/35005	A272 THE LUTH TO THE LUTH	WISBOROUGH GREEN	153

A283/43005	PARK ROAD	PETWORTH	137
A272/6010	A272 GARBITTS LANE TO FYNING LANE	ROGATE	211
A283/38008	A283 HASLINGBOURNE TO WOODRUFF LANE	PETWORTH	186
A283/34005	THE FLEET	FITTLEWORTH	117
A259/7010	A259 COLWORTH LANE TO COLWORTH LANE	OVING	159
A272/10005	A272 CHITHURST LANE TO FITZHALL ROAD	TROTTON WITH CHITHURST	347
A272/10010	A272 CHITHURST LANE TO FITZHALL ROAD	TROTTON WITH CHITHURST	235
A272/3005	A272 DURLEIGHMARSH LANE TO SLADE LANE	ROGATE	919
A272/4005	A272 SLADE LANE TO SLADE LANE	ROGATE	77
A272/11005	A272 FITZHALL ROAD TO IPING LANE	STEDHAM WITH IPING	41
A27/790	A27 CHICHESTER BYPASS WESTBOUND	OVING	830
A27/2200	A27 BOXGROVE ROUNDABOUT	BOXGROVE	28
A27/470	A27 CHICHESTER BYPASS EASTBOUND	CHICHESTER	848
A27/600	WHYKE ROAD ROUNDABOUT	CHICHESTER	40
A27/500	STOCKBRIDGE ROUNDABOUT	CHICHESTER	60
A281/44505	FARTHINGS HILL	HORSHAM	155
A29/45021	LONDON ROAD	PULBOROUGH	190
A29/43015	LONDON ROAD	COLDWALTHAM	219
A2011/2013	CRAWLEY AVENUE	CRAWLEY	378
A2037/2007	HENFIELD ROAD	UPPER BEEDING	81
A27/347	MILL HILL A27 EXIT SLIP WESTBOUND	SHOREHAM / SOUTHWICK	509
