Help With...

YAHOO!

This guide will show you how to set up an email account with Yahoo!

It's free to set up a Yahoo! account. And once you have one, you'll be able to send messages or photos all over the world in seconds. You'll also be able to access a number of other online resources. Please note that there are other email providers to choose from like Outlook and Gmail.

1. Start by typing uk.yahoo.com into the address bar to get to the Yahoo! website. Then click on either "Mail" or "Email" at the top of the page.

Help

OR

Create New Account

2. From the sign-in screen, click on **Create New Account** and complete the form

3. All but the most unusual names have already been taken. If you have a nickname it may be better to use that in preference to something long and unwieldy such as “johnwilliamson1986”. Also bear in mind what you’ll use your email for e.g. “dibdobdoo” may give the wrong impression if you were applying for a job.
4. Make sure you choose a password that you will remember and in any case keep a note of it somewhere safe.
5. If you have either a mobile, a second email account or a partner who has an email account it is good practice to fill in at least one of these options in case of login problems.
