

Conditions applicable to all traffic survey equipment on the highway

A licence is valid for a minimum of 14 days

A £10m minimum public liability insurance is required along with street works accreditation. In addition to this, employers liability insurance of at least £5m is required.

A risk assessment and method statement must accompany the application.

The Licensee shall ensure that the equipment is installed and inspected by a competent and responsible person.

The applicant shall not allow the equipment to be placed any longer than is necessary.

Equipment must not be left in such a location that causes a distraction or undue obstruction of the highway. The highway should always be accessible to all users.

Equipment must be removed promptly upon completion of the survey (within 24 hours of the licence expiring) or when required by West Sussex County Council.

Faulty or dangerous equipment must be removed immediately upon request or will be removed by West Sussex County Council.

This consent cannot be taken as authorising the creation of a nuisance or a danger to users of the highway.

This application is only for equipment to be installed on the highway in West Sussex. Separate permissions must be obtained for equipment being installed on private property.

All equipment must clearly display a 24/7 contact name and telephone number for the public to report any problems (24/7).

The highway shall be left in a clean and tidy condition on removal of the equipment. Any damage shall be reported to West Sussex County Council and repaired in accordance with agreed details.

Equipment must not be affixed to street lighting columns (other than when the base is being used as a securing point) without approval from West Sussex County Council and its contractor.

On request, the Licensee may be required to engage with the local community affected by the survey equipment.

The applicant shall be responsible for checking if any roadworks are being undertaken in the vicinity of the planned traffic surveys. Information on roadworks in West Sussex is available at one.network
